

CD / DVD Storage

Can-Am is high density, high capacity CD and DVD storage at its best. Each drawer holds 270 CDs or 120 DVDs. And that's in standard packaging. 540 CDs per drawer in slimline cases. Much more in sleeves or pouches. Dust-free and secure.

Our three drawer cabinet holds 810 CDs (1620 in slimline cases) or 360 DVDs. The two drawer version holds 540 CDs (1080 in slimline cases) or 240 DVDs. Full extension sliders ensure access to every one of them. You can stack cabinets up to three high and finish them off with mica or metal tops, even put them on legs or wheels.

Two and three drawer cabinets can be combined to form just the right configuration. A fully loaded cabinet can weigh three hundred pounds and a stack could weigh over a thousand pounds. Our product is steel, our strength is a commitment to safety, quality and service. Can-Am CD / DVD storage cabinets are the choice of studios, professionals, corporate archives and serious collectors all around the world.

This is a very serious cabinet. Safety interlocking drawers allow only one drawer to open at a time, to prevent tipping. C-clamps connect stacked cabinets to each other. A unique divider and backstop system keeps everything under control, and key locks provide security. Adjustable levelers lift and stabilize the cabinet or rest in dimples topside for positive positioning when stacking.

Dust-free space efficient storage at its best. Team them up with stereo cabinets for an amazing AV center. Choose from 16 colors and relax, because you can't outgrow Can-Am storage cabinets. They grow with you. And rest assured we'll be there when you need more. We know how to build great cabinets and we know how to get them to you. We've been doing that since 1979.
